

Rudy Moise: A New Voice for Us

Dr. Rudolph "Rudy" Moise

Dr. Rudolph "Rudy" Moise will fight for progressive policies that protect our environment. He will support local and national efforts to reverse global warming and create a clean, renewable energy future.

Protecting and preserving South Florida's environment requires a legislative approach focused on the unique challenges and issues posed by irresponsible development, the growing threat of pollution, and anti-environmental energy companies. Many of these issues facing South Florida will require dedicated leadership to focus the resources of the Federal, State, and local governments towards addressing these problems.

From the restoration of the South Florida Ecosystem and the protection of the Everglades, to prohibiting off-shore drilling, Rudy Moise has the experience and courage necessary to stand up for our irreplaceable environmental resources.

ENSURE THE PROTECTION OF THE EVERGLADES

The everglades have undergone a tremendous amount of stress and deterioration in the past one hundred years. Although many areas of the Everglades are still protected, not enough has been done to restore those areas that have suffered damage. Rudy is dedicated to ensuring that the full resources of the Federal Government are channeled into enacting the Comprehensive Everglades Restoration Plan (CERP) in its entirety. He will support and sponsor new legislation that will build on previous efforts at reviving the Everglades and will make the protection of the Everglades National Park one of his top environmental priorities.

NO TO OFF-SHORE DRILLING

Rudy is opposed to "off-shore" oil drilling. If our government allows Big Oil to pursue such a short-sighted endeavor, the environmental and financial costs to the state of Florida will skyrocket. The costs associated with environmental damage and loss of income from the tourism industry will offset any benefit that the drilling will provide. Rudy will fight against any legislation seeking to drill off Florida's coasts and will sponsor and support any attempt to ban offshore oil drilling and oil exploration.

WE ARE ALL CONNECTED

While there are many issues and concerns specific to the environment in South Florida, Rudy Moise recognizes the reality that we are all interconnected and any attempt at true environmental reform will require a national approach to solve international challenges. Supporting true reform means not only protecting our environment, but also adjusting our energy priorities to ensure continued strength in the areas of economic and national security.

LIMIT THE CAUSES OF CLIMATE CHANGE

Rudy knows Climate Change is a very real threat and he supports the historic climate change legislation currently pending before the Senate. In Congress, Rudy will support further legislation to limit the causes of climate change through regulations on carbon emitting industries, tax credits to incentivize the development of cleaner technologies, and the research and development of more efficient energy resources.

DEVELOP CLEAN AND RENEWABLE ENERGY RESOURCES

Rudy Moise says that developing clean and renewable energy resources is one of the most effective ways to improve our economy through creating new, high-quality jobs, mitigate many threats to our national security, and to protect our environment. Transitioning away from fossil fuels towards cleaner renewable energy resources will not only minimize our impact on the environment, but will also ensure a decreased reliance on a volatile oil market manipulated by countries that do not have America's best interest at heart.

Rudy will support and sponsor legislation that will give funding and tax cuts to provide incentives to research, develop, and manufacture new sources of energy. This will also create quality jobs and has the potential to end our nation's dependence on foreign oil. He will also support legislation to better utilize existing renewable energy technologies such as wind, solar, hydroelectric power, and bio-fuels.
