Rudy Moise: A New Voice for Us

Dr. Rudolph "Rudy" Moise

Dr. Rudolph "Rudy" Moise has more than 30 years of experience working as a doctor. Making quality health care accessible and affordable will be among his top priorities in Congress.

HELP WITH HEALTH CARE REFORM

Rudy Moise applauds Congress and the Obama Administration for passing comprehensive Health Care Reform. He believes that expanding access to quality and affordable health insurance will help stop the loss of the nearly 45,000 people who die each year because of inadequate health insurance and reduce the crushing financial burden unplanned illnesses cause for so many American families.

FIGHTING TO KEEP INSURANCE COMPANIES HONEST

Rudy Moise is a doctor and a small business owner so he understands the need for policies that lower the cost of health care for the average citizen while not compromising on the quality of care. Rudy believes that a "Public Option" government-run insurance program is the best way to expand coverage and encourage competition in the market, which will ultimately lower costs. He will also support legislation targeting insurance fraud, creating stiff penalties for both individuals and insurance companies who seek to take advantage of honest ratepayers.

FOCUS ON HEALTHY DECISIONS AND PREVENTIVE CARE

With comprehensive health reform legislation passed, the government should now shift its focus to encouraging communities and individuals to live healthy lifestyles. This expanded access to care means that more Americans will be able to talk to their doctors about their health and medical care. Rudy applauds First Lady Michelle Obama's focus on combating childhood obesity, a leading risk factor to the health of America's children. He will continue to support such efforts and will work in Congress to expand their scope and focus; leading to a healthier, happier, and more productive America with lower burdensome medical costs for our families.

REDUCING DISPARITIES IN HEALTH CARE DELIVERY

Though America has taken a strong step towards expanding health insurance coverage to the vast majority of Americans, disparities still exist for minorities and women. Rudy is committed to ending this gap in care by supporting and sponsoring legislation that takes a tough stance on discriminatory practices by insurance companies. He will also focus on enacting policies that place an emphasis on educating both these communities and their health care providers about techniques to eliminate the disparity in the quality of care.

INCREASED FUNDING FOR CANCER AND HIV/AIDS RESEARCH

Regardless of today's medical advancements, the diseases of cancer and HIV/AIDS are still unacceptably prevalent in our society. Rudy Moise believes that cancer and HIV/AIDS research should receive increased levels of funding from the federal government and that no credible line of research should go unexplored. We must do everything we can as a nation to find a treatment for these diseases and Rudy is committed to fighting for this cause as our next Congressman.

HARNESS THE POWER OF TECHNOLOGY

As a physician, Medical Director, and CEO, Rudy Moise knows the challenges posed by managing patient files. In order to ensure top-quality care, doctors' offices and hospitals often rely on either manual systems that waste hours of productivity or electronic systems that currently can be very costly. Rudy will support legislation in Congress that updates and standardizes electronic record keeping in all public health facilities. This coordinated transition will lead to a reduction in fatal medical errors and will reduce the amount of valuable time and money spent on recordkeeping.
